

10 Chair *Exercises*

A gentle, chair-supported visual guide — for strength, balance & mobility

Before you begin

- ✓ Check with your physician before starting a new exercise routine, especially if you have any concerns.
- ✓ Use a stable, armless chair on a non-slip floor, with clear space around you.
- ✓ Wear supportive footwear (or go barefoot on a non-slip floor) — avoid loose slippers.
- ✓ Keep water within easy reach, and rest whenever you need to.
- ✓ Move slowly and never force a movement — a little effort, never pain.
- ✓ If you feel dizzy, short of breath, or any pain, stop and rest.

01 Chair-Assisted Squat

STANDING · CHAIR-SUPPORTED

- 1 Stand tall behind the chair, feet about shoulder-width apart, both hands resting on the backrest.
- 2 Send your hips back and down as if reaching for a seat — hips bend first, then knees.
- 3 Lower to a comfortable depth, keeping your knees behind your toes and your chest lifted.
- 4 Press through your heels to stand tall again.

Move slowly, 8–12 times.

02 Chair-Assisted Reverse Lunge

STANDING · CHAIR-SUPPORTED

- 1 Stand tall behind the chair, both hands on the backrest for support.
- 2 Step one foot back and lower into a gentle lunge, back knee reaching toward the floor.
- 3 Keep your front knee stacked over your ankle.
- 4 Press through the front heel to return, then repeat on the other leg.

Move slowly, 8–12 times each side.

03

Chair-Assisted Hip Abduction

STANDING · CHAIR-SUPPORTED

- 1 Stand tall behind the chair, hands on the backrest, weight on one leg.
- 2 Keeping the moving leg straight and your toes pointing forward, lift it out to the side.
- 3 Pause briefly at the top, then lower with control.
- 4 Repeat, then switch to the other leg.

Move slowly, 8–12 times each side.

04 Seated Crunch

SEATED

- 1 Sit tall toward the front of the chair, feet flat, hands resting lightly by your ears.
- 2 Draw your ribs toward your hips, curling your shoulders forward from your middle.
- 3 Keep your hips and shoulders steady, and don't pull on your neck.
- 4 Return to sitting tall, and repeat.

Move slowly, 8–12 times.

05

Seated Bicycle Crunch

SEATED

- 1 Sit tall, feet flat, hands resting lightly by your ears.
- 2 Lift one knee and gently rotate the opposite elbow toward it.
- 3 Sit tall again, then switch sides in a slow, steady rhythm.
- 4 Move from your middle, never your neck.

Move slowly, 8–12 times each side.

06

Toe-Tap with Bicep Curl

SEATED

- 1 Sit tall, arms hanging at your sides, palms facing forward.
- 2 Lift one foot and tap your toe to the floor in front of you.
- 3 At the same time, bend both elbows to curl your hands toward your shoulders.
- 4 Lower and switch feet, keeping a smooth rhythm.

Move slowly, 8–12 times each side.

07 Heel-Tap with Overhead Press

SEATED

- 1 Sit tall with your elbows bent at shoulder height, like a goalpost.
- 2 Lift one foot and tap your heel to the floor in front of you.
- 3 As you tap, press both hands straight up overhead.
- 4 Lower and switch feet, keeping tall posture throughout.

Move slowly, 8–12 times each side.

08

Seated Arm Circles

SEATED · OPTIONAL MARCHING

- 1 Sit tall with your arms out to the sides at shoulder height, like wings.
- 2 Draw slow circles with your arms — first one direction, then the other.
- 3 If it feels good, gently march your feet in place as you circle.
- 4 Keep your shoulders relaxed and away from your ears.

Move slowly, 8–12 circles each way.

09

Seated Cat–Cow

SEATED

- 1 Sit tall with your hands resting on your knees.
- 2 Inhale, lift your chest and gently arch, squeezing your shoulder blades together (Cow).
- 3 Exhale, round your back and draw your chin toward your chest (Cat).
- 4 Flow slowly between the two, moving with your breath.

Move slowly, 8–12 times.

10

Y-T-A Raises

SEATED

- 1 Sit tall with your arms out to the sides, palms facing up.
- 2 Reach both arms overhead into a “Y,” slightly in front of your body.
- 3 Open them out to a “T,” level with your shoulders.
- 4 Draw them back into an “A,” squeezing your shoulder blades — then reverse and repeat.

Move slowly, 8–12 times.

TaiMotion showcase

One gentle app, everything built around you:

- ✓ **Personalized meal plan** — a weekly plan with a smart groceries list you can swap, tick off and shop from, while you keep an easy eye on your calories on your weight-loss journey.
- ✓ **Walking & Chair Tai Chi** — over **100 follow-along videos**, seated or standing, always at your own pace.
- ✓ **Simple trackers** — water, weight, mood, stress, fasting and balance, so you can watch how you feel improve.
- ✓ **Academy lessons** — a short, calming lesson each day to keep you learning.
- ✓ **Guided challenges** — friendly little challenges to keep you moving and motivated.
